**GRASS ACCUMULATION RECALL -  
CLEANING PROCEDURE**

**A STEP BY STEP GUIDE**

# PERSONAL PROTECTIVE EQUIPMENT

To avoid injury ensure that you are wearing the correct Personal Protective Equipment (PPE) before commencing the cleaning procedure described below.

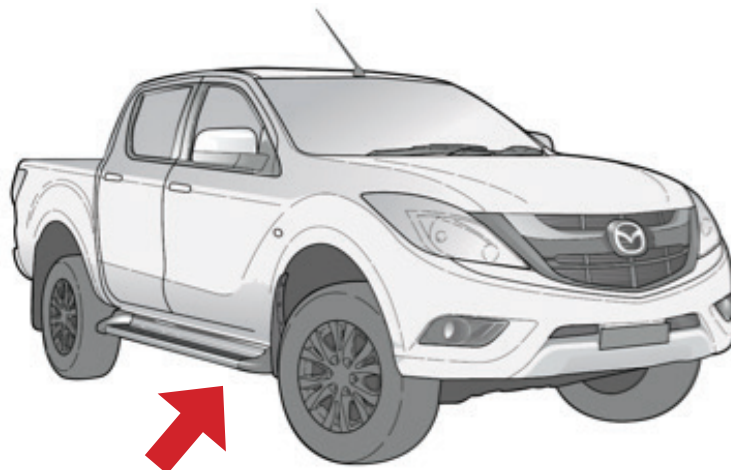

**LEATHER  
GLOVES**

**SAFETY  
GLASSES**

## GETTING STARTED

- 1 /** Locate an appropriate area that is free from debris and has adequate room to safely move around the vehicle. The procedure must be carried out on a hard level surface.
  - a.** For Automatic Transmission vehicles: Turn off the ignition, place the transmission selector lever in position P (Park) and securely apply the Parking Brake.
  - b.** For Manual Transmission vehicles: Turn off the ignition, place the transmission selector in the 1st or reverse position and securely apply the Parking Brake.
- 2 /** To avoid injury ensure that you wait until the vehicle has cooled down. Mazda recommends waiting for a minimum of 1 hour after the vehicle ignition has been turned off.
- 3 /** Inspect for any grass / debris accumulation at the point indicated below. To inspect the affected area, you will need to inspect from under the vehicle. Mazda recommends placing a ground sheet down before accessing the underside of the vehicle.

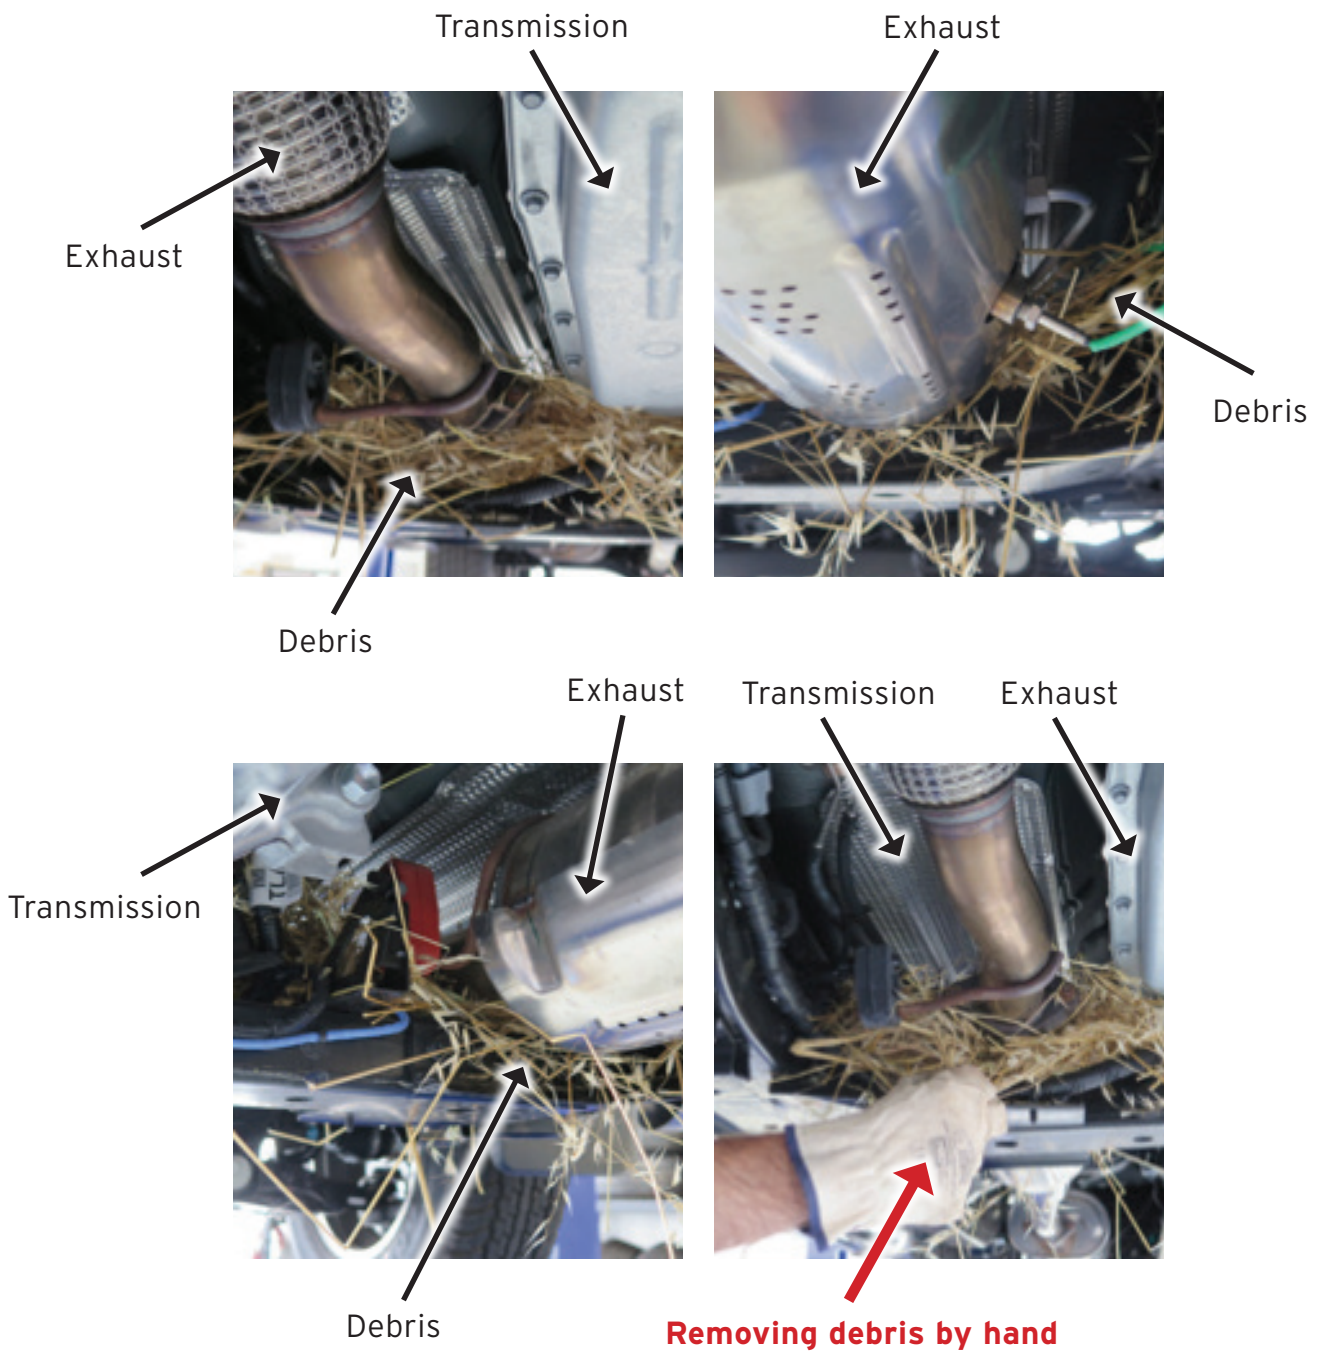

**INSPECTION AREA**

---

**4 /** If there are any signs of debris buildup, this will need to be removed. Removal can be achieved by dislodging the debris by hand.

**Note:** Please attempt to remove all debris before driving the vehicle.

**Note:** Once debris is removed, please ensure that you do not continue to drive in high grass areas.
